This is your journey, your life!

My Commitment to You:

I will be wholly committed to you on your journey over during the Shine Consultation and afterwards for support. My role is to share enabling and helpful trainings and therapeutics to support and enable you to HOW to move towards the resolve you desire - towards living life more comfortably more of the time. I will work with you to the highest professional & ethical standards with care, integrity & honesty at all times. I will be flexible and attentive to your specific details - You are unique and will be treated accordingly- you were born to soar and be magnificently YOU! Although the following information may seem a lot to cover in 3 days, and we can only cover so much in 3 days, however, my job is to make that easy and simple and empowering for you, applying what only is relevant and you choose to work on. to you. The 3 days are not the fix but the start of a supportive and progressive set of trainings, coaching and therapeutics which will require practice during and after the 3 days.

My background: I am trained in the studies of the physiology of human biology (pancreatic, adrenal, neurological, endocrine, intestinal); nutritional, orthomolecular medicines and environmental studies as a clinical ecologist; and carrying on the unique and exceptional work pioneered by DS.c Gwynne H Davies ND.DO Cl.Eco.Rtd. I have attended many, (and regularly continue to attend) training courses including many master classes including Epigenetics, phonocardiology, biophotonics in the nutritional and natural world; and studied extensively and continue to study daily linking myself with many world class experts in the field. I am now the UK trainer, examiner and certificatory of the insurable Clinical Ecology qualification for practitioners.

Trained also as an advanced Emotional Therapist, advanced NLP, clinical hypnotherapy and life-coaching and many other beautiful processes such as the wholeness process and others. With many years behind me teaching/examining students internationally and supervising qualified practitioners.

I also have been working as an empath/intuitive with energetic healing for many years. Working with the Angelic and Ascension Masters and Mother Earth shamanic type processes and combining DNA Science based heart Coherence. (this is an optional aspect of Shine)

The Shine Consultation - What I Expect from You:

To be Willing, Ready & Open to participate fully during the consultation. You will be required to become a team with me to work together. We will address beliefs about issues and symptoms, considering other health professional opinions, and the possibilities for the future. You will be required to be flexible in your thinking and be open and honest at all times.

To embrace the invitation of gentle yet powerful therapeutics, trainings and clinical consultation, apply & integrate into daily practice. And most of Be You!

Clinical ecology is the term used whereby a holistic consultant aims to restore the balance of the physical, emotional and spiritual balance of the individual person. Thus approaching any condition to achieve the maximum quality of life for as long as possible.

We will use advanced nlp and beautiful therapeutics and similar techniques from all of my trainings to clear and release swiftly, causative stuckness of unwanted patterns, feelings, traumas and learnt behaviours (often unconsciously and through no fault of your own), that are often contributing to the invisible, yet profoundly effecting your symptoms.

I will teach you simple, powerful bespoke techniques tailored specifically for you to employ as a self-help tool, that is designed to enable you to move forward with an easy simplicity that may become a way of functioning and being.

Over Day One and Two, Bringing you home to the reminder and rediscovery of the very essence of who you truly are with no doing or having or getting or learning!, and from there on I will be sharing and training you with information from the studies of all of my above trainings that is specific to you to inform and assist you on your personal healing journey. We will be looking into your unique heart-centred - brain-body neurology, how and why that effects the adrenal responses and consequently other systems in the body such as the vagus nerve and acetylcholine (the major break on inflammatory processes and regulatory body for well-being). Stress of any sort long term is well known to lead to adrenal weakness and fatigue, and immune suppression affecting all systems. Adrenal exhaustion is in my opinion one of the most underlying and important areas to address to achieve optimum health. It is always present in chronic conditions. Long -term sustained arousal of the adrenal system leads to immune suppression and the suppression of the parasympathetic nervous system (inclusive of the vagus nerve), leading to a vicious cycle the fight or flight response which the body may get neurologically and epigenetically locked into. Stress is stress whatever the cause, physical or emotional!

Another important area to consider is the ability of the brain to rewire itself (Neuroplasticity). Neuroplasticity, also known as brain plasticity, is an umbrella term that encompasses both synaptic plasticity and non-synaptic plasticity—it refers to changes in neural pathways and synapses which are due to changes from emotional, behaviour, environment and neural processes, as well as changes resulting from bodily injury. These can alter body and brain responses, which then get stuck and off-set the healthy default patterns in other systems, emotional and or physical Neuroplasticity has replaced the formerly-held position that the brain is a physiologically static organ, and explores how - and in which ways - the brain changes throughout life. We will address deeper unresolved trauma and upset once and for all at a therapeutic level in short sessions as required and create bespoke, slick, bespoke-tailored tools to suit you to enable you to navigate life with more heart resilience and positive influence for mind and body to align more for joy and balance, as much as is humanly possible- we were inherently designed to be able to tap into greater resilience than previously thought.

Over Day Two and Three from the studies of epigenetics we will consider environmental signals through perceptions, which in turn may effect of our genes. How you see the world selects which genes are going to be activated and modifies the interpretations to make proteins that best fit the environmental circumstances of the

time. Perception and beliefs can hugely affect our responses, but not all perceptions are true. Misperceptions are interpretations of the world, the stories we tell ourselves, that are inaccurate, may affect our biology and which can lead to dysfunctions and disease which is why thought becomes a prominent contributor to the state of health we express. Perception is the primary mechanism that controls our biology.

We shall be looking at the brain of the gut 'the pancreas' and the consequent interaction to all other systems that may be affecting your well-being and or recovery. Directly wired to the brain, heart and other systems, the gut is 80% of the immune system! Nutritional, natural and environment chemistry is vital to our well-being.

The Pancreas- The pancreas is the instigator endocrine/exocrine organ/gland in the body, a compound gland situated in the duodenum curve behind the stomach. It is our central computer of all metabolic/enzymatic/chemical processes and affecting all other organs (heart, liver, spleen, brain etc etc) and like any computer is essential that it is functioning correctly - if it is overloaded/fed incorrect information, the system may mal-function.

By testing the pancreas (according to the trainings in this modality) it is possible to source the indicative malfunction and follow with an individually tailored approach. If you have adverse symptomology, then always consult your doctor first - this will ascertain whether the problem is organic or not and advise accordingly.

The Gut-Contains approximately 80% + of your immune system and is your defence from the 'outside'- considering the gut receives from everything from the outside, that's a very, very big role it plays. The gut contains a system of trillions of friendly microbes all playing a role involved with many processes and functions to maintain homeostasis and health. When there is an imbalance or disturbance through physical, chemical or emotional stress, symptoms can arise causing all sorts of havoc.

Pain & Inflammation is the body's warning system and chronic pain or inflammation is never good often leading onto other symptoms. Often the body gets stuck in a chronic cycle, which will need to be unlocked to allow the body to resume a healthy way of being. .

Adrenal Stress of any sort long term is well known to lead to adrenal atrophy (weakness and fatigue) and immune- suppression. Adrenal exhaustion, and the suppression of acetylcholine, is in my opinion one of the most underlying and important areas to address to achieve optimum health. It is always present in chronic conditions. Commonly pathogens, parasites, hidden food sensitivities, unknown syndromes and allergies may cause symptoms and never had been considered, only to find they may be the very root of a long history of symptoms that nobody really got to the bottom of. Emotional stress is equally important and related to symptoms - long term sustained arousal of the adrenal system leads to immune suppression and a vicious cycle the fight or flight response which the body may get neurologically locked into. Stress is stress whatever the cause! .

Clinical Ecology is a specialized and methodical process using painless and safe means of the unique Davies Test, applied kinesiology, allergy testing, vibrational and radionic energy biofeedback testing along with nutrient, enzymes & orthomolecular medicines, epigenology and biphotonics as and if necessary; nlp, hypnotherapy, coaching, emotional trainings and other procedures, with a view to seek and resolve the root causes. During Shine we will have a consultation to advise you on a highly individual plan of action to support your healing journey.

On day Three we shall consider the 'other' brain –the Heart! Latest studies indicate the heart as an organ that can be affected directly or independently of other systems and thus has been reclassified as an endocrine organ in its own right. Quite literally we can feel heartache or 'hit in the heart". A phono cardiology reading will be taken in the extended clinical ecology option. This is one of the most advanced steth readings in the world and is an indicative and useful tool for seeking more in depth, indicative information for the process of the emotional and physical realignment with the original blueprint of the heart.

An energetic heart and soul journey reading and realignment session is an optional part of Shine. It is based upon the intuitive, experience and studied healing modalities of vibrational energy, Angelic and shamanic type work.

Optional on Day 3 Energy Soul Alignment with Kazy.

When working in tandem with Kazy, the work takes on a different dynamic, the aim here to EMBODY positive physical and emotional improvements and support for the individual.
